Carolyn,

Yes to both.

EPA Region 6 is our lead, and they have deployed an OSC (Greg Fife) to the area. I am copying their lead on this note (Eric).

EPA ORIA is supporting Region 6 by providing a team and monitors. I am meeting in 1 minute on how best to do that.

EPA has been in close contact with the State of NM and the DOE team on this issue, and will remain so connected.

Subject: Los Alamos response

We are being asked by Senator Tom Udall's office (D-NM):

1. Is EPA planning to deploy any additional monitors to the area. If not, the Senator may formally request it. They cited EPA's Radnet page with the response in May 2000 providing deployables, etc.
>I was planning to respond with the current NM monitors (<http://www.epa.gov/japan2011/rert/radnet-data-map.html#NM>) and note that the existing monitors provide continuous, overlapping coverage, etc.

2. Has EPA-R6 deployed OSCs to the area?

They are very anxious for a response, so please let me know as soon

as possible how to respond. Thanks!
